## Care and Maintenance of your **Pivotech Shower Screen**

To preserve the life of your shower screen, the anodized and powder coated aluminium sections require regular cleaning to remove and prevent a build-up of soap scum, mildew and hard water lime scale.

- Start cleaning at installation, ensuring construction materials such as concrete, plaster and paint splashes are removed before they have a chance to dry.
- Wipe the surfaces with a clean. nonabrasive damp cloth using warm water and nonabrasive, pH neutral detergent solution.
- Never use abrasive household cleaners, steel wool, hard brushes or excessive abrasive rubbing which will wear, damage and dull the finish.
- For more stubborn dirt, a mild detergent should be used with a soft brush or sponge.
- Surfaces should be thoroughly rinsed after cleaning to remove all residues.

designed simplicity

## **WARNINGS**

It is important to follow the cleaning instructions outlined in this guide to ensure the finish of your shower screen is preserved over the years.

- Do not use cleaners that contain Hydrofluoric or Phosphoric Acid
- Never use alkaline, acidic or abrasive based cleaners
- Under no circumstances use strong solvent or harsh detergents, bleach, scourers or any other abrasive cleaner on frame
- Do not clean glass when the glass is hot or in direct sunlight
- Avoid causing extreme temperature changes to the glass as this may lead to thermal fracture of the glass
- Some tapes or adhesives can stain or damage glass surfaces. Avoid using such materials unless they are known to be easily removed
